AffiLayer — Brand Guidelines

Open books, not big promises. AffiLayer is a global CPA affiliate network operated by MarketSync Global LLC, New Mexico, USA. Always write the name as **AffiLayer** — capital A, capital L, one word. Never Affi Layer, Affilayer, AFFILAYER, or AL. Product names: SmartLink, Net30, CPA / CPL / CPS / CPC. People are affiliates and advertisers — never "publishers".

The mark

A capital A built from three stacked layers — the layers of the network. Gold, always in this order top to bottom: #D97706, #F59E0B, #FBBF24.

Lockups

- Dark wordmark (logo.svg) on light backgrounds.
- Light wordmark (logo-light.svg) on dark backgrounds.
- Mark alone (logo-mark.svg) for avatars, favicons and small sizes.

Clear space & minimum size

Clear space: minimum one "A-leg width" on all sides. Minimum sizes: mark 24px, full lockup 120px wide.

Colours

Page #070D1A Cards #111C30 Borders #1E2A3F

Muted text #8A97A8 #D97706 #F59E0B #FBBF24 Button text #0B1220

Gold is always a 90° ramp in that order, never a flat fill, never reversed.

Type

The wordmark is set in Inter ExtraBold. The site itself uses the system font stack — no webfont is loaded — so headlines are bold system sans, and the gold gradient is used sparingly: H1 accent words and slogans only.

Do / Don't

- Do use the mark on navy; do keep the band order; do link the logo to affilayer.com.
- Don't stretch, recolour, or outline the mark; don't put the light lockup on a light background; don't add a tagline to the logo; don't use the OG image as a logo.

Voice

Say what's live, no more, no less. Small promises, open records. Plain words, short sentences. Numbers only when real. Never claim earnings, guaranteed results, "best network", "highest paying", or AI optimisation — SmartLink uses clear deterministic rules, no AI optimisation, no guaranteed earnings. No testimonials, no client logos, no invented partner names. The white-label line "Your affiliates never see AffiLayer" is a product fact, not a brand line — never quote it in brand or press copy.
